24th Street Water Main Installation and Resurfacing Project at 18th Avenue

In order to connect the new 24th Street water main to the existing water supply, it will be necessary for construction of the water main to extend into 18th Avenue. This work will begin on Wednesday, August 5th and should be completed within 7 to 10 days.

Two-way traffic will be maintained on 18th Avenue at this intersection while this work is ongoing. To alleviate any construction traffic delays and for the safety of the workers, the City of Rock Island is encouraging motorists to use alternate routes around the 18th Avenue and 24th Street intersection.

Due to the locations of the water mains, some turning movements from 18th Avenue onto 24th Street may be restricted. If the restrictions are required, traffic will be detoured using 25th Street.

All residences and local businesses along 24th Street can be accessed during the course of this work.

The City of Rock Island is sorry for any inconvenience due to this road and water main construction and appreciates the patience and consideration of the traveling public.
