

Support of Downtown Rock Island SSA

Downtown Rock Island is on the verge of a major revitalization with millions of dollars in exciting upgrades planned for both shared spaces and private properties. These investments will lead to a better downtown if we communicate, organize and collaborate to achieve our goal of making Downtown Rock Island a more attractive place to visit, shop, live, work, invest and play.

To forge a positive, sustainable path forward, the Downtown Rock Island Steering Committee in partnership with the Quad Cities Chamber has identified the need for an official place management organization funded by the City of Rock Island and property owners through a Special Service Area (SSA).

With financial support from the City of Rock Island, and as a property owner in Downtown Rock Island, I am in support of the proposed SSA and place management organization affiliated with the Chamber to help achieve these goals.
