Phone Number: (309) 732-2310

Facility Name: Rock Island

Contact Person: Water Operator

Homeowner's Collection Form for Lead and Copper

These samples are being collected to determine the lead and copper levels in your tap water. This sampling effort is required by the USEPA and your State under the lead and copper rule, and is being accomplished through a collaboration between the public water system and their consumers (e.g. residence).

1. There must be a minimum of 6 hours during which there is no water used from the tap where the sample will be collected and any taps adjacent or close to that tap. Either early mornings or evenings upon returning home are the best sampling times to ensure that the necessary stagnant water conditions exist. Do NOT intentionally flush the water line before the start of the 6 hour period.
2. Use a kitchen or bathroom cold-water faucet for sampling that has been used for drinking water consumption in the past few weeks. If you have a water softener on your kitchen taps, collect from the bathroom tap that is not attached to a water softener, or a point of use filter, if possible. Do not remove the aerator prior to sampling. Place the opened sample bottle below the faucet and open the cold water tap as you would to fill a glass of water.

*Addresses identified as Tier 1 or Tier 2 sites will receive 5 bottles instead of 1. Please follow the sampling instructions above. Fill each bottle consecutively in numeric order. Submit bottles 1 and 5 to the water system. Discard bottles 2, 3 and 4.

FILL SAMPLE BOTTLE COMPLETELY TO THE TOP PER IEPA REGULATIONS OR SAMPLE WILL BE REJECTED!

3. Tightly cap the sample bottle and review the label at this time to ensure all information is correct. If a label is not provided, a permanent marker may be used to write the address of collection.
4. **If any plumbing repairs or replacement has been done in the home since the previous sampling event, note the information at the bottom of this form. Also if your sample was collected from a tap with a water softner, note this as well.
5. Notify water system staff once the sample is collected.
6. Results from this monitoring effort and information about lead will be provided to you as soon as practical but no later than 30 days after the system learns of the tap monitoring results. However, if excessive lead and/or copper levels are found, immediate notification will be provided (usually 1-2 working days after the system learns of the tap monitoring results).

TO BE COMPLETED BY SAMPLE COLLECTOR

Water was last used: Date 4 / 30 / 25 Time 4 : 07 a.m./(p.m.) (circle)

Sample was collected: Date 5 / 01 / 25 Time 6 : 12 (a.m.) p.m. (circle) Bottle 1

Sample was collected: Date 5 / 01 / 25 Time 6 : 15 (a.m.) p.m. (circle) Bottle 5, if applicable

Sample Collection Address: 123 Main St., Rock Island, IL

Faucet (e.g. bathroom sink): Kitchen sink

This water sample was collected at a cold water bathroom or kitchen tap and has remained motionless in the plumbing for at least 6 hours and was taken in accordance with the above directions.

FILL SAMPLE BOTTLE COMPLETELY TO THE TOP PER IEPA REGULATIONS OR SAMPLE WILL BE REJECTED!
