

MEMORANDUM

FIRE DEPARTMENT- FIRE CHIEF

TO: Thomas Thomas, City Manager

SUBJECT: City Warning Sirens

Date: 01/21/2013

The current warning sirens (6) throughout the City of Rock Island need to be upgraded to be in compliance with the FCC regulations pertaining to (Narrow Banding) efficiency technology. These sirens are activated from the emergency communication center (RICO MM) through the radio systems to warn the citizens of Rock Island of severe thunderstorms and tornado warnings. The sirens are tested the first Tuesday of every month at 10:00 AM. At the present time the communication center is using (Narrow Banding) technology, but the sirens are still on the (Wide Band) efficiency technology which will be obsolete when the FCC turns the switch to (Narrow Banding).

Braniff Communications, Inc. is the communication vendor that installed these warning sirens. They are responsible for any repairs that are necessary. It is imperative that these updates to (Narrow Banding) are completed before the spring storms arrive.

Attached is a proposal from Braniff Communications, Inc. to upgrade the (6) warning sirens throughout the City of Rock Island to comply with the FCC ruling

- Braniff Communications \$11,190.00

Recommendation:

It is recommended that the City Council award the bid for upgrading the (6) warning sirens throughout the City of Rock Island from Braniff Communications, Inc. in the amount of \$ 11,190.00 and authorize the City manager to execute the contract documents.

Submitted: James J Fobert, Fire Chief

Approved: Thomas Thomas, City Manager
