

**Memorandum
Public Works Department**

To: City Manager
Subject: 2014 Asphalt Street Milling and Patching Program, Project 2434
Date: March 13, 2014
Number: 2014-058

We have been contacted by General Asphalt Construction Company in regards to extending their contract from the past year for the 2014 Asphalt Street Milling and Patching Program. A provision in the contract states that if both parties agree, the contract can be extended additional years. The work performed by General Asphalt on this maintenance project in past year was of excellent quality and at favorable unit prices.

The program was funded for approximately \$175,000 in 2013. The amount of funds budgeted for the 2014 program is \$100,000. Funding for this program was reduced in order to fund the newly created Asphalt Recycling Program.

Engineering typically sees a yearly increase in labor costs of at least 3% and material costs of 2% for our maintenance programs. This anticipated rise in labor and construction material prices would increase the programs' unit prices over last year.

RECOMMENDATION:

It is recommended that the City Council extend the 2013 Asphalt Street Milling and Patching Program maintenance contract with General Asphalt Construction Company in order to perform the required maintenance through 2014.
